

ABBYY FlexiCapture 8.0 Professional

(including ABBYY FlexiLayout Studio 8.0)

4-day Workshop (with mandatory pre-training task)

This course is intended for technical professionals specializing in data capture and document processing.

During this course, the attendee will become familiar with FlexiCapture Professional and FlexiLayout Studio tool functionality and perform a lot of practical tasks on computers.

The attendee will be able to create document template, create FlexiLayouts for semi-structured document, set up data recognition, validation and export options, will gain experience as FlexiCapture administrator and operator.

NOTE: For taking part in the workshop the attendee must complete the pre-training task beforehand.
